DEPARTMENT OF GEOGRAPHY MURSHIDABAD ADARSHA MAHAVIDYALAYA

FIELD REPORT

Title: Understanding the Socio-Economic Condition of Silk Workers of Chak Islampur, Murshidabad

INTRODUCTION:

Field survey is a part and parcel to fulfill the Geographic academic curriculum. Geography studies the diversity over the earth surface within a span of time and space. The man nature relationship varies from place to place and it depends on socio-culture, economic and political background of people who reside there. This socio-political diversity brings a number of changes in relation to the people's lives therein. This field survey helps to explore the diverse relationship of man with their immediate environmental conditions.

OBJECTIVES OF THE FIELD WORK:

1. To understand the socio- cultural background of the study area
2. To understand the demography of the study area
3. To explore the economic activity of the people of the study area.
4. To elaborate socio- economic, religious, caste structure of the study village
5. To mapped the study area and its land use pattern.

OUTCOME OF THE STUDY:

1. Student will be able incorporate classroom teaching with ground reality.
2. Student will able to learn about the methods and techniques about collection of primary information from the field.
3. Student will gets real world experience about the society
4. It will help the student to know how bring the real world information to classroom and also learn how to transform it into systematic knowledge pool.

STRENGTH

1. Field study will help student to generate primary information

Date: ___/___/___

2. It helps students to transform real world information into detectable knowledge
3. It helps the student to quantify the real world information into geographical entity

WEAKNESS

1. As it is first time field work for the student therefore, they were facing many challenges to articulate the problems to the respondent.
2. Some time, students were facing so many new circumstances in the field which may affect the quality of information which were collect, which may be not bring the real picture of the study area.

OPPORTUNITY

Data collection:

1. Students able to learn how to collect the primary information from the field.
2. Student also able to learn how to transform the real world phenomena into quantity.
3. Students also learn how to tabulate the data.
4. Student also learns about how to transform the raster data into vector format.

monthly expenses on food relief. Between six thousand to ten thousand rupees. Remaining seven percent household expenditure on foods items is above ten thousand rupees. So, the study rebel that majority of the household monthly expenditure is about six thousand to ten thousand rupees. Therefore , it shows that major chunk of the income goes to buying food items.

Table-7(Expenditure on education)

The above table narrate that educational status in the study area not well up . The study rebel average expenditure in educational sector lies between two thousand rupees to five thousand rupees . Majority of the respondent in from that their monthly family expenses is about two thousand rupees . One fifth respondent family expenditure on education lies between two thousand to five thousand rupees . Only , negligible share of the household educational expenses above five thousand rupees . Thus, the study contained out that educational expenditure contribute only one forth of their monthly income .
